

MOBILE

HIT & WIN

ARCADE HEIST

Come and beat me!

A revolutionary multiplayer, real-time betting experience. Arcade Heist successfully merges the excitement of traditional gambling with the highly engaging dynamics of co-operative arcade gaming.

Players fight with their mobile devices against the giant boss, Goliath. They bet money on five range-based attacks and win individually depending on hitting the attack. The amount they win depends on which attack and the bonus given based on their current streak. They also win as a team by depleting boss HP and winning the Jackpot. The higher they get on the leaderboard, the bigger the reward.

A collaborative entertainment centre that creates active, high-yield gaming hubs!

FEATURES

- Streak multipliers
- Knockout Jackpot
