HIT & WIN

ARCADE HEIST

Come and beat me!

A revolutionary multiplayer, real-time betting experience, specially designed for Retail environments. Arcade Heist successfully merges the excitement of traditional gambling with the highly engaging dynamics of co-operative arcade gaming.

Players fight with their mobile devices (In-Shop Mobile) connected to the TV against the giant boss, Goliath. They bet money on five range-based attacks and win individually depending on hitting the attack. The amount they win depends on which attack and the bonus given based on their current streak. They also win as a team by depleting boss HP and winning the Jackpot. The higher they get on the leaderboard, the bigger the reward.

A collaborative entertainment centre that transforms passive waiting areas into active, high-yield gaming hubs!

FEATURES

- Streak multipliers
- Knockout Jackpot
